EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Heintz on 10/8/05.

The application has been amended as follows:

Claims 49-56 (Canceled.)

2. The following is an examiner's statement of reasons for allowance:

In a method/device for detecting whether an audible alarm generated by a smoke detector has went off by detecting and analyzing audible alarm output from the smoke detector alarm, the claimed use of audible alarm sound signal temporal pattern discrimination in the manner claimed in combination with the setting of the threshold from the detected peak amplitude of the input audible sound signal (i.e. a percentage of the peak level of the detected audible sound signal including the alarm sound), instead of the conventional setting of threshold based on a minimum or quiescent/ambient signal level (i.e. noise floor), is not taught or suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
